Simple. Efficient. Atraumatic.

Want to reduce a working port while freeing up a working hand? Now available is a table mounted solution that provides unparalleled exposure without compromise on safety. Whether laparoscopic or robot assisted, Nathanson Liver Retraction solutions adapt to the surgeon's needs and provide versatility for varying patient sizes.

- Robotic and laparoscopic models available
- 3mm, 5mm, and 6.5mm diameter sized 'hooks'
- Extended tip variations for thicker abdominal walls
- Hexagonal fitting eliminates axial rotation/slippage of the liver
